

Technical specification

Wool Classics: Cord

Construction	Plain loop pile tufted
Yarn content	100% pure new wool
Gauge	5/32nd
Total pile height	+/- 4.0mm
Total carpet thickness	+/- 6.0mm
Total pile weight	+/- 1080gms/m ²
Total carpet weight	+/- 2430gms/m ²
Primary backing	Polypropylene
Secondary backing	Actionbac®
Production width	+/- 4.00m
TOG rating	0.96
Flammability	BS4790: Pass
Suitability	Heavy domestic use– including stairs Light contract – excluding stairs

Colour selection

Due to variations in bulk dyeing, the colour in the finished carpet may vary slightly from those of the sample. Where a particular colour match is required, a stock cutting is available on request. It should be taken into consideration when selecting colours that darker shades camouflage soiling more than lighter shades. This is especially relevant in heavy use locations in both domestic or contract installations.

Surface visual effects

Certain variances, including linear effects and striations, in the pile surface texture are inherent in all quality wool carpets. To an overwhelming degree, these slight irregularities are due to the fact that wool is a natural material and must be allowed a greater tolerance than synthetic yarn.

Installation

All aspects of sub-floor preparation and floorcovering installation should be in accordance with the recommendations of BS5325, "The Installation of Textile Floorcoverings".

Area rugs

This collection can be supplied, made to specific dimensions, as finished rugs or runners, bound with either Linen or Leather tapes or bordered carpet using a contrasting colour from this range. Further details are available on request.

Cleaning and maintenance

A cleaning guide is available upon request.

Tolerances

All specifications are subject to normal manufacturing tolerances. The company reserves the right to modify carpet specifications without notice, where performance is not effected.

All information provided above and technical advice, whether verbal, written or by way of trial samples is for guidance only and submitted in good faith, but without warranty, since the skill of installation, site conditions and a wide range of local factors are beyond our control.
